

FOR IMMEDIATE RELEASE:**NoiseBuster® Reduces Engine and Crowd Noise So Motorsports Fans Won't Miss a Word of Racing Action**

Enjoy Hearing Communications from Race Car Drivers, Crew Chiefs, Sports and Race Officials Clearly Without Overamplification or Distortion

WILTON, CT, January 1, 2009 – Ideal for motorsports fans, the NoiseBuster® Active Noise Reduction Earmuff utilizes advanced noise-canceling electronics to reduce the unwanted engine and crowd noise that interferes with a racing spectator's ability to hear scanner communications clearly. The high-performance, professional-grade NoiseBuster Active Noise Reduction Earmuff delivers a 26NRR (noise reduction rating) passively plus an additional up to 20dB of active noise cancellation so trackside communications can be heard clearly--without overamplifying or distorting the signal. The NoiseBuster's noise-canceling electronics are efficiently powered by a single AA battery. The product features soft, pliable ear cushions and an adjustable, comfort headband. Over-the-head and behind-the-head styles are available.

NoiseBuster Active Noise Reduction Earmuffs can be purchased at www.noisebuster.net.

About Pro Tech Technologies, Inc.

Pro Tech Technologies, Inc. is dedicated to engineering high-performance, low-cost active noise reduction products that deliver the best in hearing protection and improved intelligibility of communications.
