

HOLIDAY GIFT GUIDE:

Gifts That Will Add A Brighter Touch to the Holidays

DRAMAQUEEN.COM has it all! A beauty bag full of all the things to make us beautiful and help keep us glamorous. Each pampering product, from bubble bath to cookies, has been tried personally by the queen and those in her royal court, so you're sure to love it. Experiment and just have fun. That's what beauty is all about!

Want to give the right gift for the holidays? Check out these perfect presents.

Just launched at the NYC Toy Fair last February, the two newest board adventures from Buffalo Games include **FACES** and **LAST WORD**. In **FACES**, just one look at the myriad vintage pictures of all those zany men and women - and wacky animals - gets the laughter started.

LAST WORD is fun and fast-paced. A letter card says "C" and a subject card reads "Vegetables" and everyone shouts out words such as "Celery" and "Cucumber." Last one in before the random sound buzzer wins the round and advances towards winning!

De-stress your mind and heal your sun damaged skin this winter with hydrating facial supplements from **PLANTOGEN**, plant derived spa therapy.

The exclusive line includes Corrective Eye Gel, Intensive Firming Serum, Overnight Stress Repair, along with facial cleansers, moisturizers and toners and body scrubs.

For more information, go to www.plantogen.com.

The **NEW SOFT TOUCH LASER BY NULASE** and **LASER-ENHANCED SKIN CARE** is an exciting new alternative to cosmetic surgery, chemical peels or Botox injections. Simple and easy to use, the products stimulate the rejuvenation process and the regenerative power of your skin in a natural, non-invasive way, without redness or irritation.

The **SOFT TOUCH LASER** and **LASER-ENHANCED SKIN CARE**, a dynamic new concept in anti-aging technology. For more information, www.nulase.com.

The **NOISEBUSTER** is a lightweight electronic noise canceling audio headphone and a separately sold earmuff that incorporates state-of-the-art technology for hearing protection. The robust safety product is also an excellent choice for do-it-yourselfers and motor sports fans. Unlike traditional passive-only earmuffs and earplugs, the **NOISEBUSTER** provides more complete protection from a wider range of noise frequencies, particularly the low frequency noise generated by engines, motors and fans that is prevalent in many industrial settings. Resistant to water, moisture, contaminants, mechanical shock and vibration, the product features soft, pliable ear cushions and an adjustable, extra-wide headband that can be worn over-the-head or behind-the-head.

For more information, go on-line to www.noisebuster.net/nb-safety-online.html.
