SAFETY KNIFE

The ergonomically designed Easy Cut from ADCO is engineered to reduce injuries and material damage. The blade is automatically stored inside the cutter when not in use, and both ends of the blade have been rounded and polished to minimize potential product damage when cutting. Contact: ADCO Industries.

SAMPLING PUMP

Nextteq's patented Thermal Ring is designed for on-the-spot correction of temperature variances. The ambient temperature display encircles the base of Gastec Gas Sampling Pumps and measures from 32 degrees F to 104 degrees F at 9-degree intervals. GV-100 pumps included in the GV-100-S-TR and GV-100-SOHA-TR sampling kits have the Thermal Ring, and a kit is available for retrofitting other pumps. Contact: Nextteq.

DRIVING INSTRUCTION

The *Defensive Driving: 15-Passenger Van* video program from Coastal Training Technologies® has been created to help 15-passenger van drivers avoid becoming a crash

statistic. The program, which focuses on helping inexperienced drivers with no formal training, provides safe driving techniques and tips to protect passengers. Also, it includes live-action sequences of safe driving and animated rollover crashes. Contact:

Coastal Training Technologies.

ESCAPE HOOD

The AOSafety® Escape Hood CB Plus features a blower that filters incoming air, eliminates breathing resistance, prevents fogging, and provides easy donning and wearing. The hood's neck dam fits easily over any head size and has no mouth bits, nose cups, or straps with which to hassle. It meets requirements for chemical-biological escape hoods as tested at the U.S. Army Research, Development, and Engineering Command. Contact: AOSafety-Respiratory Protection.

BIRD REPELLENT

Bird-B-Gone's Bird Spike 2000 is designed to eliminate bird droppings and the health-related problems that can accompany them—without harming birds. The spike prevents birds from landing and roosting on a surface. The

weatherproof and non-conductive Bird Spike 2000 is made of UV-protected polycarbonate and is not affected by extreme temperatures. Available in a variety of colors, including crystal clear, it is easy to install and maintain. Contact: Bird-B-Gone Inc.

EMERGENCY DATA SYSTEM

RAE Systems introduces RAEShare, a hosted service designed to provide real-time incident data to first responders and security officers. RAEShare collects and stores sensor data from multiple AreaRAE networks so it can be shared through a secure, online interface with experts in remote locations. If a network connection is inaccessible, the service offers an optional mobile Internet connection. Contact: RAE Systems.

MOBILE LIGHT

The Prolite® Magnifier Roll-A-Round base is designed to bring instant mobility and space-saving convenience to traditional bench-mounted lighting fixtures. The heavy-duty base is 32 inches high, features a five-leg caster system for stability and is heavyweight underneath for extra tipping resistance, and is compatible with most magnifier and lighting fixtures that use a standard one-half-inch bottom mounting pin. Contact: O.C. White.

NOISE CANCELING MUFF

The NoiseBuster® electronic noise canceling (ENC) ear muff from Pro Tech Communications is designed to protect from a wide range of noises. With an NRR of 24 dB, its ENC component provides 20 dB of additional protection within the 20-800 Hz low-frequency bandwidth. An audio input feature allows use with radios and scanners and is powered by a AA battery. Contact: Pro Tech Communications Inc.
