

Banish Unwanted Noise

PRO-TECH has a new and improved model of its superior NoiseBuster active noise reduction headphone, which was first introduced 11 years ago. **NoiseBuster NB-FX**, at \$69, delivers noise cancellation performance when you need it most – while mowing the lawn, flying in a noisy jet, commuting among chattering cellphone folk, riding the sound-blasting subway, or in any similar irritating environment.

The open-back design makes the NoiseBuster comfortable to wear. It folds for easy storage and carrying. A carry bag, dual prong adapter and AAA battery are included in the package. Available for \$69 at www.protechcommunications.com.
