

NOISE BUSTING HEADPHONES

How many times have you been on a plane listening to your own music or watching an in-flight movie, but you could not fully enjoy the experience because of background noise? The next time you jet-set, use NoiseBuster®, an active noise reduction headphone. This special headphone reduces unwanted noise by coupling low frequency noise waves with their exact mirror image waves. NoiseBuster® is also great for using while exercising, mowing the lawn or train commuting. NoiseBuster® comes complete with a carry pouch, battery and airline adapter at a list price of \$69. For more information, visit <http://www.protechcommunications.com/ptcnoisebuster.htm>.
