

FirstLook

Sharing the spotlight are stained glass doors, an industrial saw blade, noise-reducing earmuffs and a tiltable trimmer.

Industrial saw blade

The 10-inch TCG saw blade from CMT USA features 60 teeth, triple chip grind, 5/8-inch bore diameter and 0.126 kerf thickness. It is designed for cabinet shops working on melamine, MDF and chipboard. The European-manufactured blade is also available in 12-inch diameter.

Noise-reducing earmuff

The NoiseBuster electronic noise-canceling earmuff from Pro Tech Communications provides more protection than passive-only earmuffs and earplugs, especially from the low-frequency noise generated by engines, motors and fans. Its passive component has a noise-reduction rating of 26dB, and its electronic component provides as much as 20dB of added noise reduction.
